Fertilizer Research **31:** 373–375, 1992

Index to Volume 31

Subrahmanyam, K., Chattopadhyay, A., Nair, A.K. and Singh, D.V.: Yield response and iron status of Japanese mint as influenced by soil and foliar applied iron 1
Sharma, B.D., Jalota, S.K., Kar, S. and Singh, C.B.: Effect of nitrogen and water uptake on yield of wheat 5
Papadopoulos, I.: Phosphorus fertigation of trickle-irrigated potato 9
Rasmussen, P.E. and Douglas, C.L., Jr.: The influence of tillage and cropping-intensity on cereal response to nitrogen, sulfur, and phosphorus 15
Bolland, M.D.A. and Paynter, B.H.: Comparative responses of annual pasture legume species to superphosphate applications in medium and high rainfall areas of Western Australia 21
Brennan, R.F.: The role of manganese and nitrogen nutrition in the susceptibility of wheat plants to take-all in Western Australia 35
Brennan, R.F.: Effect of superphosphate and nitrogen on yield and take-all of wheat 43
Williams, P.H. and Haynes, R.J.: Balance sheet of phosphorus, sulphur and potassium in a long-term grazed pasture supplied with superphosphate 51
Eynard, A., del Campillo, M.C., Barrón, V. and Torrent J.: Use of vivianite ($Fe_3(PO).8HO$) to prevent iron chlorosis in calcareous soils 61
Hafner, H., Ndunguru, B.J., Bationo, A. and Marschner, H.: Effect of nitrogen, phosphorus and molybdenum application on growth and symbiotic N-fixation of groundnut in an acid sandy soil in Niger 69
Sarandón, S.J. and Gianibelli, M.C.: Effect of foliar sprayings of urea during or after anthesis on dry matter and nitrogen accumulation in the grain of two wheat cultivars of *T. aestivum* L. 79
Loganathan, P., Hedley, M.J., Clark, S.A. and Bolan, N.S.: Granulation of finely crystalline ammonium sulphate using calcium oxide and sulphuric acid 85
Bolland, M.D.A.: Residual value of superphosphate measured using yields of different pasture legume species and bicarbonate – extractable soil phosphorus 95
Braithwaite, A.C., Eaton, A.C. and Groom, P.S.: Chemical effects in commercial and laboratory mixtures of 'reactive' phosphate rock and acidulated fertilisers 111
Leyshon, D.W. and Day, D.P.: Map manufacture using the pipe reactor 119
Lin, M.L. and Fox, R.L.: The comparative agronomic effectiveness of rock phosphate and superphosphate for banana 131
Braithwaite, A.C., Eaton A.C. and Groom, P.S.: Evaluation of double extraction techniques as solubility tests for fertiliser products containing phosphate rock components 137
Cassman, K.G. and Plant, R.E.: A model to predict crop response to applied fertilizer nutrients in heterogeneous fields 151
Sanginga, N.: Early growth and N_2-fixation of leucaena and gliricidia at different levels of phosphorus application 165
Bationo, A., Christianson, C.B., Baethgen, W.E. and Mokwunye, A.U.: A farm-level evaluation of nitrogen and phosphorus fertilizer use and planting density for pearl millet production in Niger 175
Hassan, Z.A., Young, S.D., Hepburn, C. and Arizal, R.: Urea-rubber matrices as slow-release fertilizers *I. Modelling of urea release from a urea-rubber matrix* 185
Duda, G.G.: Use of simplex-lattice design techniques to determine optimum distribution of fertilizers between times of their application 193
Hadas, A. and Rosenberg, R.: Guano as a nitrogen source for fertigation in organic farming 209
Brennan, R.F.: The effect of zinc fertilizer on take-all and the grain yield of wheat grown on zinc-deficient soils of the Esperance region, Western Australia 215
Humphreys, E., Chalk, P.M., Muirhead, W.A. and White, R.J.G.: Nitrogen fertilization of dry-seeded rice in south-east Australia 221
Nyborg, M. and Malhi, S.S.: Effectiveness of fall- versus spring-applied urea on barley *Pellet size and depth of placement* 235

Melgar, R.J., Smyth, T.J., Sanchez, P.A. and Cravo, M.S.: Fertilizer nitrogen movement in a Central Amazon Oxisol and Entisol cropped to corn 241

Short communication

Singh, K.: Critical soil level of zinc for wheat grown in alkaline soils 253

Dwivedi, B.S., Ram, M., Singh, B.P., Das, M. and Prasad, R.N.: Effect of liming on boron nutrition of pea *(Pisum sativum* L.) and corn (*Zea mays* L.) grown in sequence in an acid Alfisol 257

Sukhada Mohandas: Effect of VAM inoculation on plant growth, nutrient level and root phosphatase activity in papaya (*Carica papaya* cv. Coorg Honey Dew) 263

Diez, J.A., Cartagena, M^{a}C. and Vallejo, A.: Controlling phosphorus fixation in calcareous soils by using coated diammonium phosphate 269

Radel, R.J., Randle, A.A., Gautney, J., Bock, B.R. and Williams, H.M.: Thiophosphoryl triamide: a dual purpose urease/nitrification inhibitor 275

Wong, M.T.F., Van der Kruijs, A.C.B.M. and Juo, A.S.R.: Leaching loss of calcium, magnesium, potassium and nitrate derived from soil, lime and fertilizers as influenced by urea applied to undisturbed lysimeters in south-east Nigeria 281

Loganathan, P., Hedley, M.J. and Clark, S.A.: The manufacture and evaluation of granular potassium chloride fertilizers 291

Greenwood, D.J., Neeteson, J.J., Draycott, A., Wijnen, G. and Stone, D.A.: Measurement and simulation of the effects of N- fertilizer on growth, plant composition and distribution of soil mineral-N in nationwide onion experiments 305

Bolland, M.D.A.: The current and residual value of superphosphate for lupins grown in rotation with oats and wheat on a deep sandy soil 319

Bolland, M.D.A.: Residual value of superphosphate for wheat and lupin grain production on a uniform yellow sandplain soil 331

Freney, J.R., Denmead, O.T., Wood, A.W., Saffigna, P.G., Chapman, L.S., Ham, G.J., Hurney, A.P. and Stewart, R.L.: Factors controlling ammonia loss from trash covered sugarcane fields fertilized with urea 341

Saoud, A.A., Van Cleemput, O. and Hofman, G.: Uptake and balance of labelled fertilizer nitrogen by potatoes 351

Ditsch, D.C., Alley, M.M., Kelley, K.R. and Lei, Y.Z.: Detectability of ^{15}N-depleted fertilizer N in soil and plant tissue during a corn-rye crop rotation 355

Bolland, M.D.A. and Gilkes, R.J.: Evaluation of the Bray 1, calcium acetate lactate (CAL), Truog and Colwell soil tests as predictors of triticale grain production on soil fertilized with superphosphate and rock phosphate 363
